

What's next

- AVO team meeting soon:
 - Decide and focus on science cases
 - Start SRM planning
- AVO science team members participated to all break-out groups, so have followed the process

Jan. 2005 Demo

- Your input (preliminary assessment!):
 - REALLY impressed by your work, great science cases!
 - Comparison with models, SEDs (IVOA \Rightarrow Web services)
 - Access to a lot of data (IVOA \Rightarrow Registries)
 - Querying large catalogues
- Will need SWG help with tools, models, etc.

Jan. 2005 Demo (cont.)

- Need to make direct link from science cases to VO
- Need to assess data availability
- Need to assess technological requirements
- Expect to hear from us soon!

Important but likely more difficult to plan demo

SRM

- Great start here!
- Cosmology and stars WG provided very good list of topics (with name attached)
- After AVO team meeting we'll need input from all groups:
 - one paragraph on science case
 - data that will be needed (look ahead, 3-4 yrs time scale)
 - why is VO approach unique/vital?
- Timeline: September
- AVO science team will collect input and start putting together document

SWG's tasks after the meeting

- Keep helping us in our work towards the demo (more involvement): top priority
- Continue work on SRM (see above): topics, assignments, input to us
