

Workshop

Garching, June 27 – July 1 2005

SIAP-SSAP DAL Tutorial Conclusions

Isa Barbarisi, Jesus Salgado

ESAVO-ESAC

Isa.Barbarisi@esa.int, Jesus.Salgado@sciops.esa.int

Positive Aspects

- Run two levels at the same time was positive. Expert and not-expert users can work in parallel
- Positive attitude and feedback from people
- Specific questions could be answered on the fly

Problems found

- Systems too much different, not all of them with a correct configuration

(Effort done in making very portable tutorials)

- Groups too much heterogeneous. Not-expert, expert and very advanced users were mixed in the same group

(Problem partially solved running two levels in parallel. Could the users decide the level in advance?)
