

Workshop

Garching, June 27 – July 1, 2005

Registry Summary

Kevin Benson, Astrogrid, MSSL (kmb@mssl.ucl.ac.uk)

Marco Leoni, ESO (mleoni@eso.org)

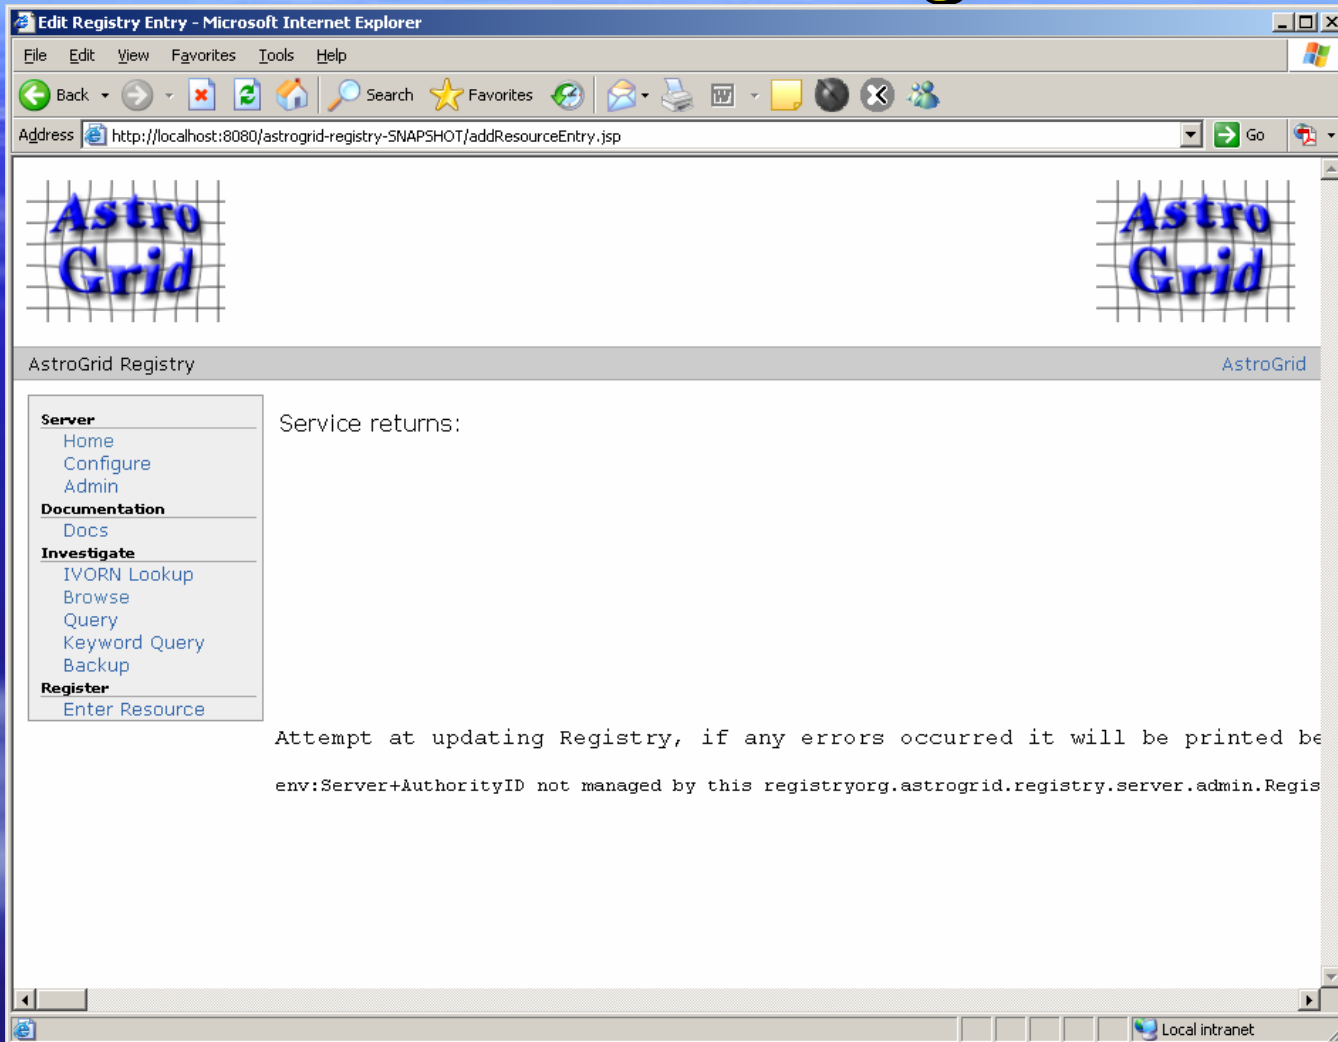

Tutorial Recap

- Description and capabilities demonstration.
- Part 1: Querying, Entering(/Removing) Resources, Harvesting.
- Part 2: Installation, Setting properties, Steps through eXist, Self Registration.
- Xforms (beta).

Suggestions

- Better error messages.
- More successful messages.
- Expand documentation with usability info and examples (other than admin and installation).
- Save new resource XML file locally before submission.
- Add *look&feel* customization.

Error Messages

Harvesting - 1

Welcome

Welcome to a Very Cool Registry. These are the direct access pages for Registering your resource with the IVO, and/or investigating what resources are available.

This Registry main authorityid **org.eurovo8080**
Click [here](#) to see the main Registry type for this registry and all authority ids managed by this registry.

Your registry is in embed/internal mode with the data storage inside your webapp. It is advisable to have the data storage outside your webapp, read the configure page to see how this is done in the documentation area.

Done Local intranet

Overall Feelings

- Easy to use even for the non-technical audience.
- Understand what “Harvest” is.
- Nice to have an XML DB (eXist): even for different uses.

**Thank You
ALL!**
